DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Isakson et al. (US 4,640,838).

Isakson ('838) teaches a single-use valve for mounting on a package made of non-directional laminate material, particularly food packages the contents of which are to be heated in a microwave oven, the valve arranged to open in response to an excess pressure generated inside the package upon heating of the latter, wherein the valve comprises an opening in the form of a straight slit formed in the package, and an adhesive layer in the form of a resilient tape/label being applied on top of the opening, and in that the valve is arranged to emit a sound signal when subjected to the pressure load (*See col. 4, l. 52 to col. 5, l. 18 and FIGs 2 and 4 where packages #17 and #30 have valves in the form of a tape/label with adhesive layers #14 and #24 positioned over straight slit #36.*).
